PROFILE

iOS Engineer with 7+ years of experience, specializing in secure mobile payment solutions (4+ years). Currently own SDK infrastructure development at Visa Inc., with expertise in native platform architecture, comprehensive testing frameworks, and regulatory compliance. Proven leader who coordinates globally distributed teams across engineering, DevOps, and security certification to build accessible, enterprise-scale payment solutions serving diverse user populations.

EXPERIENCE

Visa Inc. - Software Engineer (iOS) | Remote

2021 - Present

- Spearheaded UL Solutions SDK certification, ensuring all test cases met specification requirements with documented evidence, while aligning security, compliance, and engineering teams on mobile transaction safety standards.
- Owned primary development responsibilities for a major iOS SDK release, delivering feature implementations and test automation while maintaining 100% production stability.
- Own full-stack development and maintenance of a mobile payment SDK for secure Apple ecosystem transactions, providing direct technical guidance and implementation support to merchants and clients worldwide.
- Leveraged AI tools to enhance daily development workflows, achieving ~50% productivity improvement across coding tasks while establishing comprehensive test environments for more rigorous test case coverage and validation.

El Norte Newspaper — iOS Developer | Monterrey, Mexico

2019 - 2020

- Software Engineer responsible for the end-to-end development of 3 iOS applications, encompassing both backend and frontend architecture.
- Spearheaded the design and implementation of a regex-based parsing algorithm to extract and format article data from HTML responses, streamlining data processing and enabling seamless integration into the application front-end alongside well-placed ad integrations.

EDUCATION

Bachelor's Degree in Software Development Engineer — Universidad Tecmilenio

- GPA: 3.8 | Graduated: June 2020
